In this present decade chemical fertilizers and pesticides were used by farmers in a large scale to control, insects and get high yield. But the hidden truth is slowly human beings were infected by little amount of poison and our health condition become questionable. To overcome this people, need to follow tradition framer method and need to prepare and utilize organic manure, organic fertilizer and organic pesticide which is good to human health, soil friendly, eco sustainable. So our college extension department RESCAPES arranged a program for the first PG students. “Organic Manure Preparation Demonstration” MR. JEGAN from YULVAN TRUST was the resource person. He explained about the various uses of different organic manure and pesticide. And also explained the preparation method to the students. The material for preparing and demonstration of organic manure was funded by “KAR GLOBAL FOUNDATION”

UPROOTING JULIFERA PLANT BY STUDENTS (FOLLOW UP AT THALUTHALAPATTY)

16-12-2022 to 20-01-2023

During 20-8-2018 our college in collaboration with Young Indians Trichy Chapter, uprooted the Julifera in the Thaluthalapatty Lake. Due to natural causes the julifera plant had grown again in the lake. To support the village people for irrigation purpose, cattle feeding and in protecting the surrounding environment the students actively involved in uprooting the julifera plants in the lake of Thaluthalapatty. Daily morning students from each department went to their respective adopted village, during afternoon they reach Thaluthalapatty village and were involved in uprooting of Julifera plants. Students cut the julifera plants from the bottom and carried them and placed in the banks of the pond. This activity help the rural people in many ways.
